Foreword

In this time of crisis it is likely to prove increasingly difficult to obtain supplies of pharmaceutical products of peace time foreign origin, whether from enemy or neutral countries. The country must depend primarily on its own resources. These are far more extensive than is generally realized, while special steps have been taken during recent months to meet the possible deficiencies in an emergency.

This schedule has been prepared by the Association of British Chemical Manufacturers in order that the medical profession may be made aware of the British sources of supply for products which are available in replacement of foreign proprietaries.

The information on which the correlation of foreign and British products is based in the schedule is, for the most part, generally available in other published works. While every effort has been made to ensure accuracy, the Association cannot accept responsibility for the information it has obtained from these sources.

It came to the notice of the Association, after the first edition of this schedule had been printed, that the products mentioned below are in fact made in this country by the firms indicated:—

<i>Firm</i>	<i>Product</i>
Ciba Ltd.	Dial tablets
Denver Chemical Manufacturing Co.	Antiphlogistine
Menley & James Ltd.	Calsiod
Modern Pharmacals Ltd.	Sulfarsenol
H. R. Napp Ltd.	{ Fiatal
	{ Raminal
	{ Somnosal
Gedeon Richter (Great Britain) Ltd.	{ Aurobin
	{ Kalmopyrin
Roche Products Ltd.	{ Digalen
	{ Larostidin
	{ Omnopon
William R. Warner Ltd.	{ Anusol
	{ Veganin

The need in these circumstances to prepare a new edition provided the opportunity for making other amendments and

additions; some of the latter are particularly important, relating as they do to British made identical preparations in replacement of such foreign products as Atebrin, Avertin, Doryl, Evipan Sodium, Fouadin, Plasmoquine and Uroselectan B. It is interesting to note in passing that the necessary clinical tests have been made on the British preparations and it has been authoritatively established that they are identical in their therapeutic properties with the foreign materials.

One effect of the war has been to incite those who in peace time imported, in particular, enemy products, to manufacture certain of those products in this country, or to arrange for manufacture here on behalf of the pre-war importers. Where specific information has been brought to the knowledge of the Association, items so affected have been deleted as such entries would no longer serve their proper purpose.

The Association will welcome observations and suggestions from those who use this schedule and will be glad at all times to assist in ascertaining British sources of supply in cases of difficulty.

166 Piccadilly,
London, W.1.

April, 1940.

PHARMACEUTICAL SPECIALITIES

BRITISH EQUIVALENTS AND ALTERNATIVES FOR FOREIGN PROPRIETARY PRODUCTS

The British products shewn can be supplied in all the forms (powder, tablet, ampoules, etc.) appropriate for each.

Column 2 shews British product/s having same essential composition as item in column 1. Column 4 shews British product/s having similar therapeutic properties and capable of replacing the product in column 1.

1 Foreign Product	2 British Product/s	3 British Maker/s and/or Supplier/s	4 British Product/s	5 British Maker/s and/or Supplier/s
Acecoline	Acetylcholine chloride Pragmoline	B D H B W Evans M & B		
Acidol	Betain hydrochloride	Boots (I) B D H (I) Evans (I)		
Acidol pepsin	Betaine hydrochloride and pepsin	Boots (I) B D H (I) Evans (I) Richter (I)		
Adalin	Carbromal BP Planadalin	A & H (I) Boots (I) B D H (I) Evans (I) M & B (I) Richter (I) M & B		
Afenil	Calcium chloride and urea	B D H Evans		
Agurin	Theobromine and sodium acetate	Boots B D H Evans M & B T & H S Whiffen		
Airol	Bismuth oxyiodogallate BPC	Boots B D H B W Evans M & B T & H S Whiffen		
Albargin			Silver protein BP	A & H (I) Boots (I) B D H (I) B W (I) Evans (I) Johnsons J F M (I) M & B (I)

Column 2 shews British product/s having same essential composition as item in column 1.
Column 4 shews British product/s having similar therapeutic properties and capable of replacing the product in column 1.

1 Foreign Product	2 British Product/s	3 British Maker/s and/or Supplier/s	4 British Product/s	5 British Maker/s and/or Supplier/s
Albucid			Sulphanilamide	A & H Boots B C B D H B W W J B Evans Glaxo M & B M C Morson Evans M & B
